To whom it may concern,

As a Software Developer II at Bell Canada, I have had the pleasure to work with Selena during her 12-month internship while they worked as a Software Developer Intern. My role was to supervise and mentor the interns on my team, and make sure they leave the company more confident in their capabilities and had meaningful career development.

The team's main responsibilities were to provide software and solutions to help with the delivery of the Fibe TV application. Selena consistently demonstrated exceptional work ethic, problem solving and teamwork. She played a key role in the delivery of three projects: a fully automated test solution that is still used to this day; a real-time health monitoring solution for customer devices; and the integration of Google voice features on our flagship TV devices, including thorough testing. As one of the only two full-time team members, I can confidently say that Selenas contributions were instrumental to our success – she showed exceptional growth and took on any challenge that was in front of her.

In addition to Selenas technical skills she brought to the team, she always came to work with a positive attitude and made sure everyone was comfortable in the work environment. She showed genuine care for her colleagues in times of stress and deadlines, creating a supportive environment for the entire team.

I am confident that Selena would excel in any software development, software test engineer, or similar role. Her dedication to her work and positive influence on her colleagues made her standout as an excellent employee.

Please feel free to contact me if you require further information.

Sincerely,

Michael Lambucki
